

SNOW OPERATIONS

Keep in mind, snow is temporary. Typically, Reno doesn't receive a lot of snow and temperatures generally warm up rather quickly and help to relieve snow that remains.

Snow Removal in Somerset

About 1/3 of Somerset residents live on private streets maintained by the SOA; residents in The Village and The Vue maintain their own streets, and the remaining streets are maintained by the City of Reno. If you don't know whether you live on a city street or SOA maintained street, see next page for list of streets.

SOA Snow removal on Private Streets

About 1/3 of Somerset residents live on private streets maintained by the SOA. Currently, the contractor performing snow removal operations is Reliance Grounds Management.

The first pass of snow plowing is typically completed within three hours of when it begins. First priority are streets with steep slopes, then all main streets, arterials, and then cul-de-sacs.

Depending on storm conditions, sidewalk snow plowing begins on Somerset Parkway first, which may be during a multi-day event or the day following the storm. The next priority is mailboxes followed by neighborhood streets.

For City of Reno snow removal operations, visit:

For information on City of Reno Snow Plow operations, visit their website (link below) or report an issue, call the City at 775-334-INFO or email renodirect@reno.gov.

Tips for Snow Removal

- Clear your driveway and sidewalk when the snow is still fresh when it's much easier to clear.
- Similar to when clearing your driveway, when the streets are plowed the snow is simply pushed from the roadway to the sides of the street. Therefore, prepare for berms and impacts from roadway snow removal. Clear your driveway *to the right*, NOT to the left. If you clear your snow to the left of your driveway, the plow cannot avoid picking up that snow which will be left on the driveway. Clear your driveway *to the RIGHT* minimizing impacts of berms.
- Don't push snow from your driveway into the street, which impedes snow plows and creates unnecessary additional snow on the street, especially after the plow has been by.
- Clear the sidewalks in front of your house as soon as possible after the storm, within 48-72 hours.
